Contents

Preface	ix
Intent of the Book	xiii
1. Plane Electromagnetic Waves	1
Introduction	1
1.1 Propagating Plane Waves	2
1.2 Polarized Plane Waves	6
1.3 Doppler Shift	10
1.4 Plane Waves in a Lossy Medium	20
1.5 Dispersion and Group Velocity	28
1.6 Power and Energy Propagation	37
1.7 Momentum Propagation	40
Endnotes	41
2. Plane Waves in Compound Media	42
Introduction	42
2.1 Plane Wave Propagating in a Material as It Orthogonally Interacts with a Second Material	43
2.2 Electromagnetic Boundary Conditions	44
2.3 Plane Wave Propagating in a Material as It Orthogonally Interacts with Two Boundaries	50
2.4 Plane Wave Propagating in a Material as It Orthogonally Interacts with Multiple Boundaries	59
2.5 Polarized Plane Waves Propagating in a Material as They Interact Obliquely with a Boundary	61
2.6 Brewster's Law	67
2.7 Applications of Snell's Law and Brewster's Law	68
Endnote	74
3. Transmission Lines and Waveguides	75
3.1 Infinitely Long Transmission Lines	75
3.2 Governing Equations	77
3.3 Special Cases	80
3.4 Power Transmission	83
3.5 Finite Transmission Lines	84
3.6 Harmonic Waves in Finite Transmission Lines	90
3.7 Using AC Spice Models	95
3.8 Transient Waves in Finite Transmission Lines	95

4. Ideal Models vs Real-World Systems **109**

Introduction	109
4.1 Ideal Transmission Lines	111
4.2 Ideal Model Transmission Line Input and Output	112
4.3 Real-World Transmission Lines	119
4.4 Effects of Surface Roughness	123
4.5 Effects of the Propagating Material	132
4.6 Effects of Grain Boundaries	136
4.7 Effects of Permeability	137
4.8 Effects of Board Complexity	140
4.9 Final Conclusions for an Ideal versus a Real-World Transmission Line	143
Endnotes	144

5. Complex Permittivity of Propagating Media **145**

Introduction	145
5.1 Basic Mechanisms of the Propagating Material	146
5.2 Permittivity of Permanent Polar Molecules	147
5.3 Induced Dipole Moments	161
5.4 Induced Dipole Response Function, $G(\tau)$	168
5.5 Frequency Character of the Permittivity	170
5.6 Kramers–Kronig Relations for Induced Moments	174
5.7 Arbitrary Time Stimulus	176
5.8 Conduction Electron Permittivity	183
5.9 Conductivity Response Function	185
5.10 Permittivity of Plasma Oscillations	188
5.11 Permittivity Summary	194
5.12 Empirical Permittivity	198
5.13 Theory Applied to Empirical Permittivity	206
5.14 Dispersion of a Signal Propagating through a Medium with Complex Permittivity	212
Endnotes	215

6. Surface Roughness **216**

Introduction	216
6.1 Snowball Model for Surface Roughness	217
6.2 Perfect Electric Conductors in Static Fields	224
6.3 Spherical Conductors in Time-Varying Fields	229
6.4 The Far-Field Region	232
6.5 Electrodynamics in Good Conducting Spheres	235
6.6 Spherical Coordinate Analysis	238
6.7 Vector Helmholtz Equation Solutions	246

6.8	Multipole Moment Analysis	249	
6.9	Scattering of Electromagnetic Waves	252	
6.10	Power Scattered and Absorbed by <i>Good</i> Conducting Spheres	261	
6.11	Applications of Fundamental Scattering	266	
	Endnotes	275	
7. Advanced Signal Integrity			277
	Introduction	277	
7.1	Induced Surface Charges and Currents	279	
7.2	Reduced Magnetic Dipole Moment Due to Field Penetration	289	
7.3	Influence of a Surface Alloy Distribution	296	
7.4	Screening of Neighboring Snowballs and Form Factors	299	
7.5	Pulse Phase Delay and Signal Dispersion	302	
	Chapter Conclusions	304	
	Endnotes	306	
8. Signal Integrity Simulations			307
	Introduction	307	
8.1	Definition of Terms and Techniques	308	
8.2	Circuit Simulation	314	
8.3	Transient SPICE Simulation	315	
8.4	Emerging SPICE Simulation Methods	318	
8.5	Fast Convolution Analysis	319	
8.6	Quasi-Static Field Solvers	322	
8.7	Full-Wave 3-D FEM Field Solvers	326	
8.8	Conclusions	330	
	Endnotes	332	
Bibliography			335
Index			337
